Education

NORTHEASTERN UNIVERSITY

Boston, MA

MS in Computer Science, GPA: 3.95/4.0

May 2026

Relevant coursework: Artificial Intelligence, Advanced Machine Learning, HCI, Web Development

Awards: Dean's List, Graduate Student Leadership Award, Climate Justice Hackathon: 1st Place

MILLS COLLEGE

Oakland, CA

BA in Public Health, Minor in Health Equity and Spanish, GPA: 3.97/4.0

June 2022

Awards: Summa Cum Laude, Eco-Justice Leadership, Palladium Society, Student Athlete Highest GPA

Technical Skills & Projects

Programming: C, C++, C#, SQL, Python, MATLAB, JavaScript, Java, Typescript, React, Node.js, HTML/CSS

Design: Figma, Adobe Creative Suite, Framer, Webflow, Wix, CAD, Blender, ProtoPie

AI-Powered EHR Documentation Assistant

Figma, Python, SQL, OpenAI API

Oct. 2025

- Designed an AI-powered assistant that synthesizes patient-provider triage conversations into structured clinical electronic health record documentation.
- Developed workflows to determine whether to create a new EHR health record or update an existing patient profile with relevant information.
- Prototyped the clinician experience in Figma and built the data and AI pipeline using Python, SQL, and the OpenAI API.

AI-Powered Clinical Training Simulator

Hugging Face, Gemma 2B, RAG, Python

May 2026

- Developed an AI-powered clinical training model that generates culturally diverse patient dialogues for clinician-facing simulations.
- Built interactive scenarios with retrieval-augmented generation (RAG) to simulate patient-provider conversations and provide real-time performance feedback.
- Evaluated conversational fidelity, clinical accuracy, and potential bias to assess model performance and fairness across diverse patient populations.

Relevant Experience

OPEN OAKLAND

Sept. 2025 – June 2026

Product Manager, Data, Privacy & Trust

Oakland, CA

- Led product strategy for data, privacy, and trust for Oakland's Democracy Dollars platform, shaping how resident information is collected, verified, stored, and used.

- Translated research and program requirements into product decisions balancing privacy, fraud prevention, accessibility, and equitable participation across diverse Oakland communities.
- Assessed identity verification vendors and developed 10+ product recommendations spanning data governance, privacy, security, accessibility, UX, cost, and implementation readiness.

EVENNESS

Aug. 2024 – June 2025

Product Manager, AI Accessibility

San Francisco, CA

- Led product strategy and development for AI-powered accessibility products, including Chrome extensions and digital interfaces designed to reduce barriers to technology.
- Translated user and client research into product roadmaps, AI feature requirements, and go-to-market strategies, balancing usability, accessibility, and technical feasibility.
- Synthesized product insights into 68 actionable product and design improvements, contributing to a 30% increase in adoption and 24% improvement in accessibility compliance.

ONE DEGREE

Aug. 2021 – June 2022

Data & UX Research Intern

San Francisco, CA

- Conducted 38 user research studies to identify barriers low-income residents faced when accessing community resources, combining qualitative research with behavioral data to inform product decisions.
- Queried and analyzed user behavior using SQL and Excel, translating findings into data-driven product recommendations, reports, and low-bandwidth mobile prototypes.
- Identified opportunities to reduce task completion time by 22% and abandoned search sessions by 20%, contributing to a 28% increase in user retention.

Leadership

TECH INTERSECTIONS — Partnerships Co-Lead / Board Member

Jan. 2024 – Present

- Lead programming, speaker selection, and community partnerships for an annual technology conference serving 250+ attendees and expanding access for underrepresented communities.

GOOGLE DEVELOPER GROUP — Founder / Lead Organizer

Aug. 2024 – Dec. 2025

- Scaled a 100+ member community, led a 10-person team, and delivered AI/ML programs reaching 1,000+ students; secured corporate partnerships and increased funding/outreach 95%.

Certifications & Professional Training

AI-First Product Leadership (LinkedIn Learning, 2026)

Training in AI product strategy, product development, and leading AI-enabled products.

Human Subjects Research (CITI Program, 2026)

Training in ethical research practices, informed consent, participant privacy, and research compliance.

Project Risk Management (LinkedIn Learning, 2025)

Training in risk identification, assessment, mitigation, and project planning.
